### 1 Pre test questionnaire

#### 1.1 Introduction

This test is a test into the fidelity of interaction in a computer interface. Based on 9 widgets, that when interacted with will render either: no sound, sound or dynamic sound, your task will be to classify these 9 objects through a series of 6 tests.

Please take your time, and interact with the 9 widgets on each page as many times as you want.

Your comments are very welcome along the way. You may comment in the fields on the next page, or in the post test questionnaire.

THANK YOU
