

TABLE INDEX

<i>Table 1.1: Quantities of energy resources available in 2006, source IEA</i>	6
<i>Table 2.1: Quick overview of the LIMPET performance.....</i>	41
<i>Table 3.1: Summary of the laboratory experiments</i>	59
<i>Table 3.2: North Sea Wave state from Kofoed and Frigaard (2008)</i>	60
<i>Table 3.3: Scale Freud.....</i>	60
<i>Table 3.4: Overview of the wave parameters for the regular and irregular waves in scale 1:20.....</i>	60
<i>Table 3.5: Overview of the wave parameters for the regular and irregular waves in scale 1:30.....</i>	61
<i>Table 3.6: The average of the efficiency among the values of the front and the back plate.</i>	72
<i>Table 3.7: Summary of the reference irregular wave states.</i>	74
<i>Table 3.8: The table illustrates the values of the power generated used to the interpolation.</i>	75
<i>Table 3.9: Performance potentially converted into useful mechanical energy by the WavePiston model</i>	75
<i>Table 3.10: Estimation of the energy converted into useful mechanical energy by the WavePiston.</i>	76
<i>Table 3.11: Summary of the performance of the WavePiston wave energy converter.....</i>	76
<i>Table 3.12: Summary of the performance of the WavePiston wave energy converter.....</i>	77
<i>Table 3.13: Performance of the WavePiston device subjected to irregular wave.....</i>	77
<i>Table 4.1: Probabilistic analysis for the wave parameters of Mazara del Vallo</i>	81
<i>Table 4.2: Wave State for Mazara del Vallo.</i>	82
<i>Table 4.3: Performance of the WavePiston wave energy converter in an Italian installation.</i>	84
<i>Table 4.4: Performance of the WavePiston wave energy converter in an Italian installation.</i>	85
<i>Table 4.5: Performance and the estimated energy converted into useful mechanical energy by the WavePiston device subjected to irregular wave in the Italian Sea.....</i>	85
<i>Table 5.1: Quick overview about the test program done</i>	97
<i>Table 5.2: Average of the efficiency between the values of the front and the back plate</i>	98
<i>Table 5.3: Summary of the performance of the WavePiston model.</i>	99
<i>Table 5.4: Summary of the performance of the WavePiston wave energy converter.....</i>	102
<i>Table 5.5: Performance and the estimated energy converted into useful mechanical energy</i>	102
<i>Table 5.6: Performance of the WavePiston wave energy converter in an Italian installation.</i>	103
<i>Table 5.7: Performance and the estimated energy that can be converted from the waves into useful mechanical energy by the WavePiston device subjected to irregular wave in the Italian Sea.....</i>	103
