
Table of contents

1	Introduction.....	1
1.1	Sensorless schemes for PMSM.....	1
1.1.1	Back EMF approach.....	2
1.1.2	Magnetic saliency based approach.....	2
1.2	Project limitations.....	4
	Bibliography.....	4
2	Basic modules.....	6
2.1	PM machine model.....	6
2.1.1	PMSM model in the dq reference frame.....	7
2.2	PWM module.....	8
2.2.1	SVM technique.....	8
2.3	Position estimation module.....	10
2.4	Transformation blocks.....	10
2.5	Controller description.....	11
2.5.1	Field Oriented Control principle.....	12
	Bibliography.....	13
3	Methodology.....	14
4	Controller design.....	16
4.1	Field Oriented Control of PMSM.....	16
4.1.1	Current controller.....	16
4.1.2	Current regulator parameters.....	17
	Bibliography.....	20
5	Sensorless control scheme based on the back- EMF.....	21
5.1	Back EMF calculation.....	21
5.2	Rotor position knowing the back EMF.....	22
5.3	e_α and e_β calculation.....	23
	Bibliography.....	23
6	Sensorless control scheme based on modified voltage model.....	24
6.1	Pure voltage model of the machine.....	24
6.1.1	Estimated rotor speed and position.....	26
6.2	High frequency signal injection.....	26
6.3	Combined observer.....	28
6.4	Control system.....	29
6.5	Simulation results.....	29

Bibliography.....	31
7 Sensorless control scheme based on adaptive observer.....	33
7.1 Adaptive observer.....	33
7.1.1 Reference model.....	33
7.1.2 Adaptive model.....	34
7.1.3 Error term.....	35
7.1.4 Estimated speed and rotor position.....	35
7.2 High frequency signal injection.....	35
7.3 Combined observer.....	36
7.4 Control system.....	38
7.5 Simulation results.....	38
7.6 Partial conclusion.....	40
Bibliography.....	41
8 Laboratory-work.....	42
8.1 The Flexible Drive System Laboratory (FDSL).....	42
8.2 Basic data processing principle.....	42
8.3 Simulink models.....	43
8.4 Project implementation.....	44
Bibliography.....	44
9 Conclusion and future prospects.....	45
Appendix A.....	46
Appendix B.....	48
Appendix C.....	50
